In October 2021, **Stadler** emerged as the winner of the tender held by Swiss Federal Railways (SBB), Turbo and RegionAlps to award a framework agreement for the manufacture and delivery of up to 510 single-decker FLIRT multiple units. This is the largest tender in Swiss railway history. An unsuccessful bidder filed an appeal against the award, but the Federal Administrative Court has now rejected this complaint. Consequently, Stadler has come out on top in another hard-fought international tender with its proven FLIRT vehicle concept.

In an initial call-off, the order of 286 FLIRT with an order volume of around 2 billion Swiss francs is planned. The framework agreement includes an option for up to 224 additional FLIRT vehicles.
