The shareholders of **Haselmeier Group**, founded in 1920 and headquartered in St. Gallen, sold all shares in Haselmeier Group for an enterprise value of 100 million Euros to stock exchange listed Swiss company **Sulzer**. The transaction has been completed on 1 October 2020 in Zurich.

By acquiring Haselmeier, Sulzer will complement its healthcare portfolio and strengthen its applicator systems division. Together with Sulzer's financial strength and know-how in precision injection moulding, the company will seize growth opportunities in the rapidly increasing drug delivery devices market.

In addition, combining Sulzer's expertise in liquid mixing applications with Haselmeier's drug delivery competence will benefit Sulzer's pharmaceutical customers by providing them with innovative and sophisticated devices and services.

## **The advisors**

**An international team from CMS, led by partners Stephan Werlen (CMS Zurich - pictured) and Stefan-Ulrich Müller (CMS Munich), [advised the shareholders of Haselmeier Group on all legal matters of the transaction](#). The Zurich team further included associates Pascal Stocker, Alexandra Stocker, Ferdinand Blezinger (all Corporate / M&A). The Munich team involved also associate Felix Schmitt.**
