LatticeFlow, an ETH spin-off pioneering in robust artificial intelligence (AI) having built a system that can automatically find and fix AI data and model errors, announced a USD 12 m Series A funding round led by **Atlantic Bridge** and **OpenOcean**, with participation from **FPV Ventures** and existing investors **btov Partners** and **Global Founders Capital**. The investment will enable LatticeFlow to expand the capabilities of its platform and respond to growing customer demand as more companies deploy computer vision models at scale.

The [Homburger](#) team comprised partner **Frank Gerhard** (corporate / m&a, pictured), lead associate **Kevin M. Hubacher** (corporate / m&a and technology and digital economy) as well as associate **Thierry Burckhardt** (corporate / m&a), partner **Luca Dal Molin** and associate **Aliénor de Dardel** (both IP / IT and technology and digital economy).
