MLL Legal has signed an agreement with Swiss-based **Logol Group** for the implementation of their **ELLE** legal software. "Focus on being a lawyer, let ELLE do the rest" is not only how the ELLE legal solution promotes itself, it is also what the law firm experienced first-hand during the product evaluation process.

ELLE is a state-of-the-art business management solution specifically designed for the legal sector and brings together functions across the entire firm's processes: marketing, sales, case management, time and billing, accounting etc., all managed within a single unified and integrated platform. This will be a further step towards the digital transformation for MLL Legal.

"Technology will significantly and very fast shape the future of law firms. At MLL Legal, we make use of the latest technology to be able to deliver our client-centric legal advice in a smart, time and cost efficient manner", said **Kilian Schärli** (managing partner, pictured).
