Bentley Systems has partnered with Teralytics to leverage data services for Bentley's mobility simulation solutions. As part of the transaction, Bentley has invested in Teralytics, in particular, contributed its Streetlytics business unit into Teralytics. In this sense, a representative of Bentley joins the board of directors of Teralytics Holding.

Teralytics is a Swiss based technology company focused on big data analytics solutions that deliver advanced mobility insights solutions for cities and transport services. From the other side, Bentley Systems is a leading infrastructure engineering software company and provider of mobility data and analytics on the moving population for planners, engineer and infrastructure asset managers

Pestalozzi has advised Bentley with regard to all Swiss law aspects of the transaction. The team included partner **Franz Schubiger** (corporate/m&a, pictured), partner **Christian Roos** (employment & pensions), partner **Nils Harbeke** (tax), associates **Monika Maric** and **Raphael Widmer** (both corporate/m&a), **Noëlie Mathis** (senior associate, tx), **Carole Winzeler** (associate, IP) as well as **Luka Dunjic** (junior associate, corporate/m&a).
