Homburger advises Verified, a Swiss based FinTech company establishing a decentralized, blockchain powered financial services platform for issuing and investing in tokenized assets, on the Swiss regulatory qualification as well as the Swiss regulatory aspect of the issuance of the Verified Liquidity Token.

The Verified Liquidity Token (symbol: VITTA) is a utility token issued by Verified that enables greater participation of investors and issuers in decentralized exchanges in order to create trading liquidity.

The [Homburger](#) team was led by partner **Daniel Haeberli** (pictured) and included associates **Alexander Wherlock** and **Fabrice Eckert** (all financial market regulation and technology and digital economy).
