CODE41, a community-centric Swiss watchmaking company, has increased its share capital by issuing participation certificates in the form of ledger-based securities, thanks to the tokenisation technology of **Taurus** and the opensource smart contract published by **CMTA**.

VISCHER has advised CODE41 in the process. The team was led by partner **Maxime Chollet** (corporate/m&a, pictured) and included senior associate **Basile Walder** and junior associate **Roksolana De Lucia** (both corporate/m&a).
