**SkyCell**, a manufacturer of data-driven temperature controlled smart containers for the pharmaceutical industry, announced the closing of its Usd 62 million growth funding round. The financing round was led by MVM Partners together with a consortium of family offices and a leading Swiss insurance company. Existing investors including the [Swiss Entrepreneurs Fund](#) and BCGE's growth fund Capital Transmission also participated in the round. The raised funds will be used to expand SkyCell's global footprint and container fleet, with particular focus on the United States and Asia.

## The team

**Walder Wyss [advised](#) SkyCell in this transaction. The team was led by partner Alex Nikitine and included senior associate Dominik Aerni and associate Riccardo Brazerol (all corporate and m&a).**
