Matterhorn Biosciences, a Swiss biotechnology company developing T cell receptor therapies based on the recent discovery of MR1T cells that recognize and kill a wide range of tumors of various tissue origins, has received a financing of USD 30 million from **Versant Ventures**. It is the most recent company to be launched out of Versant's Ridgeline Discovery Engine based in Basel, Switzerland.

The advisor

Walder Wyss [advised Versant Ventures in connection with this transaction](#). The team was led by partner Alexander Gutmans (Transaction/M&A & Venture Capital - pictured) and partner Robert von Rosen (Transaction/M&A & Venture Capital) and included partner Markus R. Frick (IP/IT), senior associate Jessica Aeschbach Flórez (Transaction/M&A) and associate Karina Tschon (Transaction/M&A).
