RTX Ventures, the venture capital arm of **Raytheon Technologies**, has made a minority investment in electric propulsion system company **H55** to drive the development of electric aviation solutions. This investment aligns with Raytheon Technologies' longstanding leadership in the development of innovative and sustainable propulsion technologies.

The Swiss H55 is a renowned company enabler of electric propulsion solutions and battery systems. The team has proven ability in developing, integrating and flight-testing electric propulsion systems, including Solar Impulse, the first solar-powered electric airplane to fly around the world.

[Walder Wyss](#) has advised H55 on this transaction. The team was led by partner **Luc Defferrard** (corporate/m&a, pictured) and further included managing associate **Grégoire Henriod**, associate **Camille Tistounet** and trainee **Maxime Meier**, all corporate and m&a.
