The Swiss FinTech startup **Expense Robot** closed a seed investment round co-led by **Swisscom Ventures** and **SIX Group**. Expense Robot uses artificial intelligence to fully automate a company's expense- and business credit card processes, from the picture of a receipt all the way to the compliance checks, the finance booking, VAT input tax reclaim, archiving and reimbursement.

**Walder Wyss advised Swisscom Ventures on this transaction. The team was led by partner Patrick W. Vogel (banking and corporate/m&a) and included managing associate André Kuhn (notary) and senior associate Laurent Schmidt (banking and corporate/m&a).**
